## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-20, new claims 40-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamashita et al (cited by the Applicant, 5894717).

Prior art discloses:

It is noted, as also discussed during the interview, dated 1/6/2006, that the region where the grass clippings are generated/cut is considered to be the cutting chamber, wherein the front portion is at the front region of the mower housing/deck delimited by the ref 17, the left side wheel, and the rear portion is at the rear region where the insert ref 38 is fastened or attached when a discharge of grass clipping is to be prevented.

Claim 17:

A mower deck comprising a top, sides, cutting chamber, front & rear, interior & outermost exterior surfaces, blade (fig 4);

Discharge (21);

An insert, fastener, a portion of which is positioned adjacent to the outermost exterior surface wall of the rear portion of the sidewall (ref 38; col. 10, ln 34-44);  
The insert having at least one other attachment region (see insert 38, at attachment region 39a in fig 6);

Claim 18:

Can be coupled via a single fastener (see fig 7);  
The rear portion of the sidewall include a guide member 36a & b);

Claims 19-20:

A mulch ramp & discharge opening orientation with respect to the blade rotation in line with air & grass flow (either ref 44 or the bent forward portion of the mower deck as shown in fig 1 can act as a ramp to direct grass towards an inner portion of the top surface, also see fig 11, ref 52, showing the downwardly directed discharge wind);

cl. 40:

A mower deck comprising a top, sides, cutting chamber, front & rear, interior & outermost exterior surfaces, blade (fig 4);  
Discharge wall & opening (at the end of ref. 21);  
Material director along wall 36a and ends at ref 21;

Art Unit: 3671

A fastener support wall adjacent to a second end of the material director (at 36ar);

An insert (38);

At least one fastener (at ref. 36ar & goes through ref 39a);

cl. 41, 44:

a plurality of elements as claimed and shown in fig 4;

cl. 42-43, 45-46:

a guide member & first & second attachment members (the wall portion rearward from 36ar, opening at ref 39a).

*Response to Arguments*

3. Applicant's arguments filed with amendments to claims 17-20 & new claims 40-46 on 12/22/2005 have been fully considered but they are not persuasive.  
Applicant's arguments are moot in view of the interview conducted on 1/6/2006.
